

# ROB BIESENBACH

## Audio/Visual Requirements

The following technical requirements are important to ensuring the best quality presentation and the best experience for the audience:

- Rob will bring his own computer (MacBook) and the necessary adaptors for connecting to the venue's projection or flat screen systems. Please confirm that the venue is Mac-compatible.
- If amplification is necessary, the audio system must allow for mobility via lavalier or handheld microphone (as opposed to a microphone fixed to a podium).
- The setup must allow for a clear sightline for Rob to his computer screen (or to a "confidence monitor").
- Speaker will arrive at the venue an hour early to work with AV staff as necessary (or earlier if room is occupied at that time).

Please notify Rob at least 15 days in advance of the event if any of these requirements cannot be met.
